

# Alessandro M. Rubin

I am a second-year student at Jesus College. My artistic interests focus mainly on Mannerist painting, Baroque sculpture, and more broadly the relation between society and art across time. I am applying to represent all the undergraduate art historians in the faculty board. I intend to bring forward the individual needs and requests of each student and I would like to intensify the connection between the representative and the rest of the student body by sending regular updates about the topics discussed during the faculty meetings.

I want to advocate for better library supplies. The faculty library has good resources, but it could definitely be improved. Right now, it is often necessary to look for relevant texts in other libraries across Cambridge, especially in first year when everybody takes the same papers. I would like to propose to make all the items on the reading lists available, so as to create a more functional working environment for the undergraduate students.

I love my course and I am committed to ensuring that everybody has the best experience possible in the department too.
